PROFILE

As a third-year Information System student, I bring a strong foundation in technology and a passion for exploring the diverse aspects of the field. My experience encompasses front-end web development, data analysis, and UI/UX design, reflecting my multidisciplinary approach to problem-solving and user-centered design principles. Additionally, I am driven to expand my knowledge and skills in machine learning, seeking opportunities to delve into this exciting and rapidly evolving field.

EXPERIENCES

Mar 2022 — Feb 2023	Staff of Media and Information, Student Body of Airlangga University As an enthusiastic Staff of Media and Information Student Body member at Airlangga University, specializing in Creative Media. With a focus on social media content creation and event participation, I excel at managing platforms, curating engaging content, and coordinating media-related events. I bring a creative mindset, strong communication skills, and a passion for staying up-to-date with industry trends, allowing me to make a valuable contribution in promoting media and information initiatives.
Feb 2022 — Feb 2023	Head of Artistic Department, Student Press Agency of the Faculty, Airlangga University As the Head of Artistic Department at LPM FORMAT FST UNAIR, the student press agency of the Faculty of Science and Technology at Airlangga University, I harnessed my artistic skills, expertise in graphic design, team management, and digital photography to provide leadership and direction to the department. Over the course of a year, I spearheaded numerous successful projects that left a positive impact on the university community.

PROJECTS

Feb 2023 — Apr 2023	Front End Web Developer of SDN Bubutan IV Website As the Front End Developer of the SDN Bubutan IV website, my responsibility involved designing and implementing a user-friendly and mobile-responsive interface with a visually appealing profile, material design elements, an admin dashboard, and chart visualization using Apache's EChart to effectively present web statistics. I built the website using Tailwind CSS, a utility-first CSS framework that enabled me to create a responsive and customizable design efficiently.
Oct 2022 — Dec 2022	UI/UX Designer of Batik HR Web Application As a UI/UX Designer, I'm responsible for designing the user-centered UI/UX for the Batik HR web application, catering to artisans, finance, and admin users, streamlining attendance, remuneration, and employee data management through an intuitive and visually appealing interface, making it a robust and efficient enterprise-level application for human resource management.
Jun 2022 — Aug 2022	UI/UX Designer of AMERTA 2022 Website As the UI/UX designer for Amerta UNAIR 2022, my responsibility was to design a user-friendly website that effectively shared information for new students across multiple platforms, enabling them to easily access and navigate through the necessary information.
